

MARYLAND Department of Health

Public Health Preparedness and Situational Awareness Report: #2020:51

Reporting for the week ending 12/19/20 (MMWR Week #51)

December 25th, 2020

CURRENT HOMELAND SECURITY THREAT LEVELS

National: No Active Alerts

Maryland: **ENHANCED** (MEMA status)

SYNDROMIC SURVEILLANCE REPORTS

ESSENCE (Electronic Surveillance System for the Early Notification of Community-based Epidemics): Graphical representation is provided for all syndromes (excluding the “Other” category; see Appendix 1) by Health and Medical Regions (See Appendix 2). Emergency department chief complaint data is presented as rates per 100,000 residents using data from the 2010 census. Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE). Baltimore, MD: Maryland Department of Health; 2020.

Gastrointestinal Syndrome

There were no Gastrointestinal Syndrome outbreaks reported this week.

Gastrointestinal Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	13.18	14.82	15.83	10.12	12.96
Median Rate*	13.11	14.69	15.46	10.04	12.92

* Per 100,000 Residents

(report continues on next page)

Respiratory Syndrome

There were one hundred and twenty-four (124) Respiratory Syndrome outbreaks reported this week: Sixteen (16) outbreaks of COVID-19 in Assisted Living Facilities (Regions 3,4,5), two (2) outbreaks of COVID-19 in Behavioral Health Facilities (Regions 3,5), two (2) outbreak of COVID-19 in Correctional Facilities (Regions 3,4), eighteen (18) outbreaks of COVID-19 in Daycare Centers (Regions 3,5), thirty-five (35) outbreaks of COVID-19 in Group Homes (Regions 1&2,3,5), one (1) outbreak of COVID-19 in a Hospice (Region 3), eleven (11) outbreak of COVID-19 in Hospitals (Regions 1&2,3,4,5), five (5) outbreaks of COVID-19 in Nursing Homes (Regions 3,5), eight (8) outbreak of COVID-19 in Outpatient Facilities (Regions 1&2,3,4,5), one (1) outbreak of COVID-19 in a Restaurant (Region 5), ten (10) outbreaks of COVID-19 in Schools (Regions 3,4,5), three (3) outbreaks of COVID-19 in Shelters (Regions 3,5), one (1) outbreak of COVID-19 in a Sober Living Home (Region 3), three (3) outbreaks of COVID-19 in Substance Use Treatment Programs (Region 3), eight (8) outbreaks of COVID-19 in Workplaces (Regions 1&2,3,4,5).

Respiratory Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	12.45	14.75	15.19	9.97	12.76
Median Rate*	12.10	14.10	14.35	9.60	12.21

* Per 100,000 Residents

(report continues on next page)

Fever Syndrome

There were no Fever Syndrome outbreaks reported this week.

Fever Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.05	3.90	4.13	3.03	3.51
Median Rate*	2.82	3.76	3.97	2.92	3.38

**Per 100,000 Residents*

(report continues on next page)

Localized Lesion Syndrome

There were no Localized Lesion Syndrome outbreaks reported this week.

Localized Lesion Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.16	1.70	1.98	0.87	1.36
Median Rate*	1.01	1.64	1.99	0.83	1.31

* Per 100,000 Residents

(report continues on next page)

Rash Syndrome

There were no Rash Syndrome outbreaks reported this week.

Rash Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.20	1.59	1.68	0.92	1.31
Median Rate*	1.21	1.53	1.55	0.87	1.27

* Per 100,000 Residents

(report continues on next page)

Neurological Syndrome

There were no Neurological Syndrome outbreaks reported this week.

Neurological Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.82	1.01	0.93	0.65	0.85
Median Rate*	0.81	0.95	0.88	0.61	0.81

* Per 100,000 Residents

(report continues on next page)

Severe Illness or Death Syndrome

There were no Severe Illness or Death Syndrome outbreaks reported this week.

Severe Illness or Death Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.65	0.88	0.84	0.54	0.73
Median Rate*	0.60	0.84	0.88	0.52	0.70

* Per 100,000 Residents

(report continues on next page)

SYNDROMES RELATED TO CATEGORY A AGENTS

Botulism-like Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Botulism-like Syndrome on 12/06 (Regions 1&2), 12/07 (Regions 1&2,4,5), 12/08 (Region 4), 12/09 (Regions 1&2,4), 12/10 (Region 5), 12/11 (Regions 1&2,3), 12/12 (Region 4), 12/15 (Regions 1&2,4), 12/16 (Region 5), 12/17 (Regions 1&2,4,5), 12/18 (Regions 3,4,5), 12/19 (Region 4). These increases are not known to be associated with any outbreaks.

Botulism-like Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.08	0.13	0.06	0.09	0.11
Median Rate*	0.00	0.11	0.00	0.09	0.10

* Per 100,000 Residents

(report continues on next page)

Hemorrhagic Illness Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Hemorrhagic Illness Syndrome on 12/09 (Regions 1&2), 12/11 (Region 4), 12/12 (Regions 1&2), 12/13 (Regions 1&2), 12/14 (Region 4). These increases are not known to be associated with any outbreaks.

Hemorrhagic Illness Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.05	0.17	0.04	0.15	0.14
Median Rate*	0.00	0.11	0.00	0.09	0.10

* Per 100,000 Residents

(report continues on next page)

Lymphadenitis Syndrome

There was an appreciable increase above baseline in the rate of ED visits for Lymphadenitis Syndrome on, 12/13 (Regions 1&2), 12/14 (Regions 1&2), 12/19 (Regions 1&2). These increases are not known to be associated with any outbreaks.

Lymphadenitis Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.40	0.60	0.41	0.40	0.49
Median Rate*	0.40	0.55	0.44	0.35	0.47

* Per 100,000 Residents

MARYLAND REPORTABLE DISEASE SURVEILLANCE

Coronavirus Disease 2019 (COVID-19) Situation Summary

On March 5th, 2020, the Maryland Department of Health announced the first cases of coronavirus disease 2019 (abbreviated COVID-19) in the State of Maryland.

Confirmed COVID-19 Case Counts in Maryland by County (As of December 25th, 2020)

County	Number of Confirmed Cases
Allegany	5,248
Anne Arundel	22,981
Baltimore City	30,440
Baltimore County	37,098
Calvert	2,105
Caroline	1,260
Carroll	4,865
Cecil	3,361
Charles	5,768
Dorchester	1,301
Frederick	10,473
Garrett	1,392
Harford	8,112
Howard	10,719
Kent	681
Montgomery	43,918
Prince George's	52,363
Queen Anne's	1,531
Somerset	1,655
St. Mary's	3,064
Talbot	1,071
Washington	7,342
Wicomico	4,408
Worcester	2,004
Total	263,160

The most up-to-date information may be found on the Maryland Department of Health website at <https://coronavirus.maryland.gov>.

(report continues on next page)

SYNDROMIC INFLUENZA SURVEILLANCE

Seasonal Influenza reporting occurs from MMWR Week 40 through MMWR Week 20 (October 2020 through May 2021). Due to the COVID-19 pandemic, influenza reporting will be extended to the beginning of the 2021-2022 reporting season (MMWR Week 40/Week Ending October 9, 2021).

Seasonal Influenza activity for Week 51 was: Minimal

Influenza-like Illness

Influenza-like Illness Baseline Data Week 1 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	10.24	14.08	13.39	11.83	12.84
Median Rate*	7.66	10.39	9.50	8.73	9.49

* Per 100,000 Residents

(report continues on next page)

Influenza-like Illness Contacts by Week

Disclaimer on eMEDS flu related data: These data are based on EMS Pre-hospital care reports where the EMS provider has selected “flu like illness” as a primary or secondary impression of a patient’s illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with influenza the actual numbers may be low. These data are reported for trending purposes only.

(report continues on next page)

Over-the-Counter Influenza-Related Medication Sales

There was no appreciable increase above baseline in the rate of OTC Medication Sales during this reporting period.

OTC Medication Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.25	4.14	2.54	7.47	5.22
Median Rate*	2.42	3.18	2.21	6.59	4.42

* Per 100,000 Residents

(report continues on next page)

Over-the-Counter Thermometer Sales

There was no appreciable increase above baseline in the rate of OTC Thermometer Sales during this reporting period.

Thermometer Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	2.71	2.57	2.09	3.40	2.86
Median Rate*	2.42	2.52	1.99	3.41	2.88

* Per 100,000 Residents

(report continues on next page)

SYNDROMIC OVERDOSE SURVEILLANCE

The purpose of this section is to characterize non-fatal ED visit trends for acute unintentional overdose by Heroin, Opioid or Unspecified substance among Maryland residents captured by ESSENCE data, including chief complaint and discharge diagnosis. ED visits that are identified as unintentional overdose by Heroin, Opioid or Unspecified substance include those with medical and non-medical use of a prescription Opioid or where the substance is not specified, given evidence that most fatal overdoses are Opioid-related.

In preparation for the release of new ESSENCE queries for identifying heroin, opioid and all drug overdoses, please note that we have removed the data chart showing unintentional overdose rates by heroin, opioid, or unspecified substances. These new data, when available, will be presented below.

(report continues on next page)

Naloxone Administration Data by Week

Disclaimer on eMEDS naloxone administration related data: These data are based on EMS Pre-hospital care reports where the EMS provider has documented that they administered naloxone. The administration of naloxone is based on the patient's signs and symptoms and not on any diagnostic tests. These data are reported for trending purposes only.

(report continues on next page)

Naloxone Administration Data

Disclaimer on eMEDS Naloxone administration related data: These data are based on EMS Pre-hospital care reports where the EMS provider has documented that they administered naloxone. The administration of naloxone is based on the patient's signs and symptoms and not on any diagnostic tests. These data are reported for trending purposes only.

PANDEMIC INFLUENZA UPDATE / AVIAN INFLUENZA-RELATED REPORTS

WHO update: The current WHO phase of pandemic alert for avian influenza is ALERT. Currently, the avian influenza H5N1 virus continues to circulate in poultry in some countries, especially in Asia and northeast Africa. This virus continues to cause sporadic human infections with some instances of limited human-to-human transmission among very close contacts. There has been no sustained human-to-human or community-level transmission identified thus far.

Influenza A (H7N9) is one of a subgroup of influenza viruses that normally circulate among birds. Until recently, this virus had not been seen in people. However, human infections have now been detected. Presently, there is limited information about the scope of the disease the virus causes and about the source of exposure. The disease is of concern because most patients have been severely ill. There is no indication thus far that it can be transmitted between people, but both animal-to-human and human-to-human routes of transmission are being actively investigated.

Alert phase: This is the phase when influenza caused by a new subtype has been identified in humans. Increased vigilance and careful risk assessment, at local, national, and global levels are characteristic of this phase. If the risk assessments indicate that the new virus is not developing into a pandemic strain, a de-escalation of activities towards those in the interpandemic phase may occur. As of December 25th, 2020, the WHO-confirmed global total (2003-2020) of human cases of H5N1 avian influenza virus infection stands at 861, of which 455 have been fatal. Thus, the case fatality rate for human H5N1 is approximately 53%.

AVIAN INFLUENZA

AVIAN INFLUENZA (BELGIUM), 24 December 2020, Information received on [and dated] 22 Dec 2020 from Dr. Herman Claeys, Head of the Health Policy Department: Read More: <https://promedmail.org/promed-post/?id=8044193>

AVIAN INFLUENZA (IRAN), 23 December 2020, Information received on [and dated] 15 Dec 2020 from Dr. Ali Safar Maken Ali, Head, Iran Veterinary Organization (IVO), Ministry of Jihad-e-Agriculture, Tehran, Iran. Read More: <https://promedmail.org/promed-post/?id=8041976>

AVIAN INFLUENZA (UNITED KINGDOM, GERMANY), 23 December 2020, Information received on [and dated] 18 Dec 2020 from Dr Christine Middlemiss, Chief Veterinary Officer, DEFRA, Department for Environment, Food and Rural Affairs, London, United Kingdom. Read More: <https://promedmail.org/promed-post/?id=8039475>

HUMAN AVIAN INFLUENZA

There were no relevant human avian influenza reports this week

NATIONAL DISEASE REPORTS

INVASIVE MOSQUITO (FLORIDA), 19 December 2020, *Aedes scapularis* is a mosquito that can spread yellow fever, Venezuelan equine encephalitis virus, and other human pathogens. Read More: <https://promedmail.org/promed-post/?id=8030361>

INTERNATIONAL DISEASE REPORTS

CORONAVIRUS DISEASE 2019 UPDATE (NIGERIA), 25 December 2020, another new variant of the coronavirus appears to have emerged in Nigeria, Africa's top public health official said [Thu 24 Dec 2020], but he added that further investigation was needed. Read More: <https://promedmail.org/promed-post/?id=8045570>

CORONAVIRUS DISEASE 2019 UPDATE (UNITED KINGDOM), 24 December 2020, The UK has detected 2 cases of another new variant of coronavirus, the health secretary Matt Hancock says. Read More: <https://promedmail.org/promed-post/?id=8043651>

UNDIAGNOSED ILLNESS (INDIA), 22 December 2020, All India Institute of Medical Sciences (AIIMS) and National Institute of Chemical Technology (NICT) in a report to the Andhra Pradesh government stated that pesticide remains could be the cause of the disease which affected the people of Eluru. Read More: <https://promedmail.org/promed-post/?id=8039474>

POLIOMYELITIS UPDATE (PAKISTAN), 22 December 2020, six polio cases have been reported in the southeastern zone after a long time, public health officials say, expressing their concern about the cases. Read More: <https://promedmail.org/promed-post/?id=8039231>

HANTAVIRUS (CHINA), 21 December 2020, Recently, a 16-year-old girl was admitted to Xi'an Children's Hospital due to sudden haemorrhagic fever. Read More: <https://promedmail.org/promed-post/?id=8036478>

NOTE: This weekly review is a compilation of data from various surveillance systems, interpreted with a focus on a potential BT event. It is not meant to be inclusive of all epidemiology data available, nor is it meant to imply that every activity reported is a definitive BT event. International reports of outbreaks due to organisms on the CDC Critical Biological Agent list will also be reported. While not "secure", please handle this information in a professional manner. Please feel free to distribute within your organization, as you feel appropriate, to other professional staff involved in emergency preparedness and infection control.

For questions about the content of this review or if you have received this and do not wish to receive these weekly notices, please e-mail us. If you have information that is pertinent to this notification process, please send it to us to be included in the routine report.
